Welcome to 3D Secure Service

3D Secure is a new service from Sanima Bank in association with Visa that lets you shop online securely with your Visa Card on merchant websites that subscribe to services of "Verified By Visa" (VbV). 3D Secure Service confirms your identity through a simple authentication process when you make online purchases. 3D Secure Service provides you with a password to protect your online transactions just like you use your PIN at the ATM

Once you register your Visa card for the Verified by Visa service you will be asked to create your own password. A One Time Password (OTP) will be sent to your registered Email/Phone Number to complete registration. You will be prompted to provide either your password or OTP (One Time Password) every time you shop online as part of the checkout process. This will protect your card from fraudulent use as purchases will only be authorised once your password or OTP has been entered into the Verified by Visa screen.
